ABOUT ME / EXECUTIVE SUMMARY

With over 15 years of dedicated experience in the tech industry, I am an **IT Manager, Software House Owner, and Systems Architect** committed to delivering high-impact business solutions. Throughout my career, I have been privileged to lead cross-functional engineering teams, manage complex software projects under tight schedules, and architect end-to-end custom enterprise systems from scratch—including enterprise ERPs, HR/Payroll modules, multi-branch distribution platforms, smart IoT monitoring systems, and financial general ledgers.

My technical foundation bridges full-stack engineering across PHP (Laravel/CodeIgniter/Yii), Node.js, React Native, and SQL with deep domain knowledge in accounting journals (P&L, Balance Sheet, FIFO), SOPs for manufacturing/distribution companies, and hardware/IoT messaging protocols. I complement traditional architecture with modern AI-assisted engineering workflows to maximize developer velocity. Dedicated to continuous learning and leadership, I leverage strong analytical skills, clear communication, and team mentorship to turn complex requirements into stable, scalable software.

PROFESSIONAL & PERSONAL SKILLS

AI & Modern Engineering	AI-Assisted Coding (Cursor, Copilot, ChatGPT/Gemini Workflows), Prompt Engineering, LLM Integration, Developer Velocity Optimization
Backend Development	PHP Native & Frameworks (Laravel 11/12, CodeIgniter, Yii), Node.js (Express.js), Java (Spring Boot), RESTful API Engineering
Frontend & Graphic Design	JavaScript (ES6+), React JS, jQuery, HTML & CSS (Bootstrap, Tailwind CSS), Adobe Photoshop, Illustrator, InDesign, CorelDraw, Flash
Mobile & IoT Infrastructure	React Native, Expo, Android Development, MQTT Protocols, UDP Smart Protocols, Modem Hardware SMS Gateways
Database & Systems Admin	MySQL, Microsoft SQL Server, MongoDB, Windows & Linux Server Administration, Git Version Control, Software Accurate Integration
Enterprise Domain Knowledge	ERP Systems, CRM, HR & Payroll Systems, Accounting Process & Journals (General Ledger, Balance Sheet, Profit/Loss, FIFO Valuation), SOPs for Distribution & Manufacturing
Leadership & Personal Skills	Project Management (Jira, Trello), Team Leadership & Scheduling, Analytical & Logical Problem Solving, Fast Learner under Tight Schedules, Corporate System Trainer & Communicator

PROFESSIONAL EXPERIENCE

Co-Founder & Business Owner	F&B Enterprise	Dec 2024 – Present
PT Sekawan Mitra Usaha (Bakso Gepeng Sekawan Rasa)		
Business Scaling & Strategy: Co-founded and manage operational strategy for a fast-growing retail business alongside 3 business partners, expanding to 2 active outlets. Brand Excellence: Maintained outstanding customer satisfaction and reputation, achieving a 4.8 / 5.0 Google Review rating across 135+ customer reviews. Systems & Operations: Oversee company administration, cost accounting, inventory controls, and POS workflow integrations.		
Owner & Technical Director	Software House	May 2023 – Present
PT Rumah Aplikasi Sejahtera		
Distribution SaaS Architecture: Spearheaded software engineering for flagship applications, including RADIS (App for Distribution) integrated with finance, accounting, sales force, and delivery modules. Client Systems Consulting: Partnered directly with distribution and general trading clients to analyze application component needs and digitize business SOPs. Project & Team Governance: Managed project schedules, code reviews, and releases using Git version control, Trello/Jira, and AI-driven development practices.		

PT Lunch Actually Jaya (Multinational Matchmaking & CRM Company)

- **Agile Sprint Management:** Worked with Agile methodologies using Jira to achieve weekly sprint goals in a fast-paced environment.
- **Legacy System Upgrade:** Initiated and structured the CRM modernization project, upgrading legacy codebase from Yii 1.1 to Laravel.
- **Full-Stack Maintenance:** Maintained, developed, and debugged global web applications built on Java Spring Boot, PHP (Yii), and WordPress backends.

IT Manager Best Manager Awardee

PT Santiniluwansa Lestari (Santini Group - Automotive Sole Distributor)

- **Custom Enterprise ERP & Accounting:** Engineered a complete distribution ERP system from scratch, automating purchasing, sales, FIFO inventory valuation, cash/bank journals, general ledger, and financial statements.
- **HR & Payroll Workflows:** Implemented internal application components aligned with distribution/manufacturing SOPs, including HR and automated payroll systems.
- **IoT Smart Solar Streetlight System:** Architected an industrial smart monitoring platform using **MQTT protocols**, UDP servers, modem integration, and Google Maps API for real-time tracking of streetlight hardware.
- **Field Sales Mobile App:** Built and launched a React Native mobile application for sales visit tracking with real-time GPS geofencing.
- **IT Leadership & Training:** Managed IT budgets, server infrastructure (Windows & Linux), network administration, and served as a confident corporate software trainer.

PHP Programmer & System Administrator

Megapulsa

- Engineered hardware bridging software connecting 20+ SMS modems concurrently for automated transaction processing and built reporting engines.

Freelance Web & Graphic Designer

- Created corporate UI/UX layouts, web portals, and graphic branding using Adobe Photoshop, Illustrator, InDesign, CorelDraw, and Flash.

FEATURED ENTERPRISE PRODUCTS & PORTFOLIO SYSTEMS

RADIS — Application for Distribution System Full-suite enterprise ERP platform covering multi-branch inventory, unit conversions, sales force tracking, tax compliance (Input/Output PPh/PPN), FIFO valuation, and live General Ledger / P&L statements.
IoT Smart Solar Streetlight System (PT Santinilestari Energi Indonesia) Cloud-connected infrastructure monitoring system utilizing MQTT services, custom UDP socket servers, and Google Maps API for live hardware health tracking, remote power toggles, and fault alerts.
G-Force POS & Dealer Order Management Portal Integrated Point of Sale and wholesale dealer platform featuring automated purchase order recommendations, stock mutations, and real-time sales trend analytics.

HONORS & RECOGNITION

 Best Manager Award (2018) PT Santiniluwansa Lestari (Scorecard: 89.08)
 Best Employee Grade III (2021) PT Santiniluwansa Lestari (Scorecard: 81.91)

EDUCATION & CERTIFICATIONS

Bachelor of Computer Science (S.Kom) Universitas Budi Luhur, Jakarta (2006) GPA: 3.15 / 4.00 Major in Information Systems. Thesis: Hotel Package System.
Leadership Training Camp Certificate MAXIMA Impact Indonesia (2016)
